

# Seekers of Souls

## EPGP-Interface

### Readme / How-to Guide

This document is intended to explain the use of the EPGP-Interface application. This program was created for use by the leadership of the Seekers of Souls (SoS) guild on the Project Quarm emulated EverQuest server. It is a front-end interface for the back end EPGP Log that SoS uses to store attendance records and points earned as well as distribute loot obtained during raids and guild events. The EPGP-Interface was designed specifically to automate as much of the process of taking attendance, determining loot winners, and entering loot awarded as possible. Where the process could not be automated, an attempt was made to streamline it and make it easier.

### Features

- Integrated Google Oauth security protocols
- Auto-updating lists pulled from the EPGP Log in real time, including: character names, effort point categories, gear point types, bid levels, and item names
- Automatic EQ log file scanning to find attendance time stamps
- One click importing of attendance data from log file
- Built-in error correction to ensure character names are accurate
- Easy manual attendance additions with auto-completing lists pulled from the EPGP Log
- Automated insertion of EP data, GP data, and Get Priority winner determinations
- Painless GP entry with date formatting and loot name error correction

## Getting started

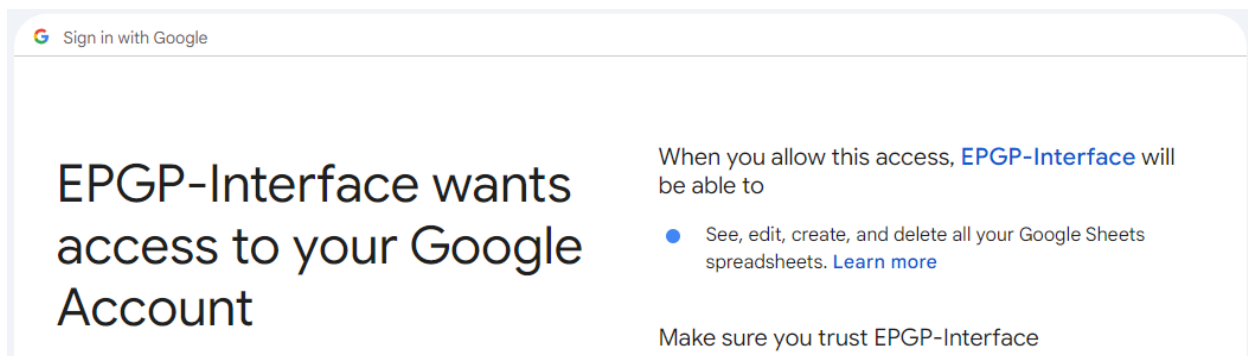

When the EPGP-Interface.zip file is decompressed the following files will be available...

Name	Date modified	Type	Size
credentials.json	5/16/2024 4:29 PM	JSON File	1 KB
EPGP-Interface.exe	6/13/2024 10:50 AM	Application	44,605 KB
Readme.pdf	6/11/2024 3:22 PM	Adobe Acrobat D...	838 KB
WindowsIcon.ico	5/21/2024 12:38 PM	Icon	3 KB

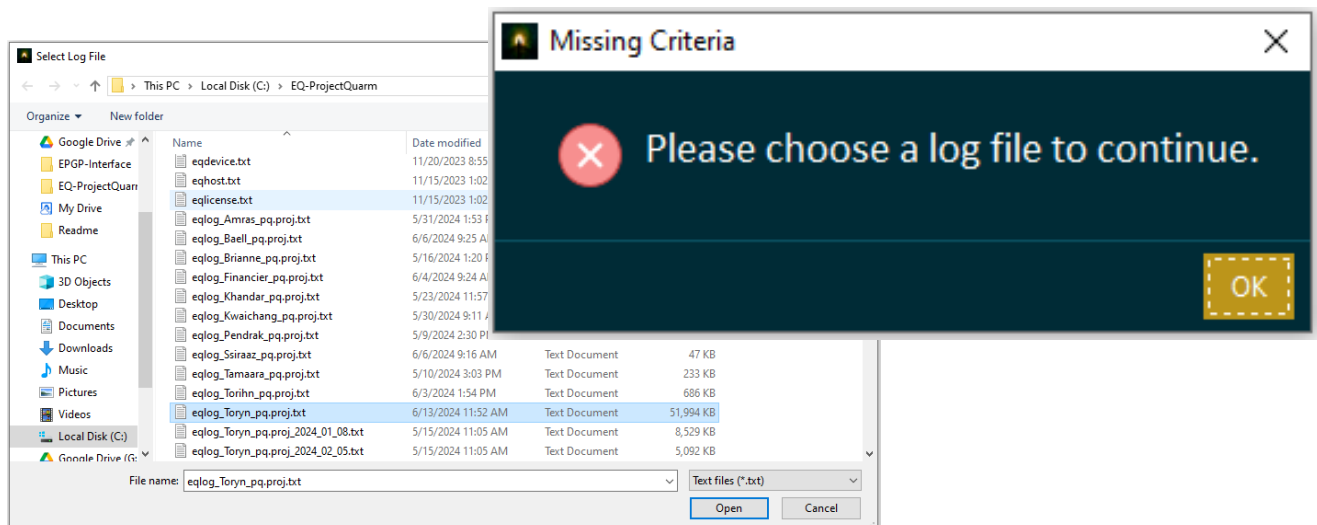

Readme.pdf is this document. The other three files must be unzipped into the same

directory (the pdf can be thrown in there too). When the program is run for the first time, two more files will be generated (config and token.json). All of these files must remain in the same directory for the EPGP-Interface to function.

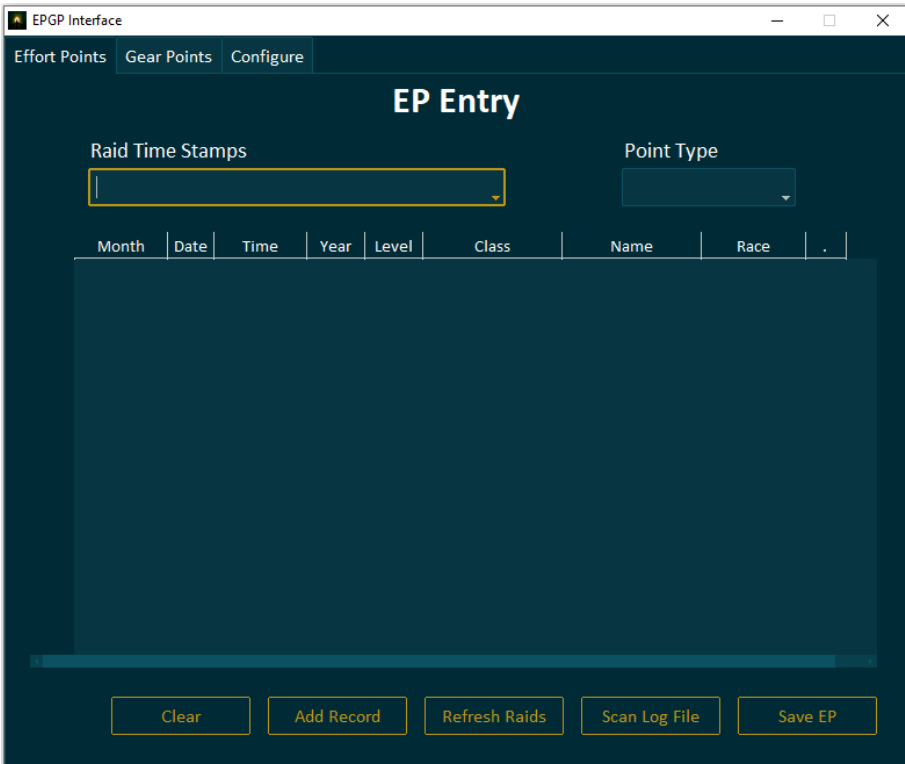

Token.json is built by the Google Sheets API and will require the user to select a Google account to use with the app. This is done automatically in a web browser, as seen here...

The config file is created after selecting an Everquest log file, as shown...

The EPGP-Interface cannot be run without a log file. Select the log for the character who will be taking attendance during a SoS event. After choosing a file the main app screen will be displayed...

The screenshot shows the EPGP Interface window with the title bar "EPGP Interface". It has three tabs: "Effort Points", "Gear Points", and "Configure". The "Effort Points" tab is active, displaying the "EP Entry" screen. The screen has a dark blue background with white text. At the top, there are two dropdown menus: "Raid Time Stamps" and "Point Type". Below these is a table with columns: "Month", "Date", "Time", "Year", "Level", "Class", "Name", "Race", and ". ". The table is currently empty. At the bottom of the screen, there are five buttons: "Clear", "Add Record", "Refresh Raids", "Scan Log File", and "Save EP".

The EPGP-Interface consists of three tabs: Effort Points, Gear Points, and Configure. The Effort Points tab will be used for taking attendance. The Gear Points tab allows for finding loot winners and entering said loot into the Log. And the Configure tab is only used (currently) to change the EQ log file.

## Effort Points (EP)

Here is a breakdown of the Effort Points tab...

Contains a list of up to 10 “time stamps” of attendance taken. NOTE: the EPGP Interface looks for “/who guild” commands with 12+ SoS members in the same zone. You MUST use “/who guild” for this to function correctly. Do not use “all.”

Before clicking ‘Save EP’, the type of points being entered must be selected here. These “point types” are pulled directly from the EPGP Log.

This area is a scrollable and editable spread sheet that will be filled with raider data. Rows can be inserted, deleted, etc. by right clicking on the row icons.

This button clears out the spread sheet and the drop-down boxes.

This button opens the add record window so that a single line of data can be added to the sheet.

This button re-scans the log file for any additional attendance taken and updates the ‘Raid Time Stamps’ dropdown. This is useful for taking attendance mid-raid.

This button pulls in raid attendance data from the log file and populates the spread sheet, based on the selected time stamp.

The screenshot shows the 'EPGP Interface' window with the 'Effort Points' tab selected. The main title is 'EP Entry'. There are two dropdown menus at the top: 'Raid Time Stamps' and 'Point Type'. Below these is a table with columns: Month, Date, Time, Year, Level, Class, Name, Race, and a row of dots. The table is currently empty. At the bottom of the window are five buttons: 'Clear', 'Add Record', 'Refresh Raids', 'Scan Log File', and 'Save EP'. Red arrows point from text annotations to each of these elements.

## Entering EP

When entering EP, the first thing to do is select a time stamp from what’s available in the ‘Raid Time Stamps’ dropdown box. After selecting the correct stamp, click ‘Scan Log File.’ This will look for the chosen date/time and compile a list of the SoS members present at that time stamp. After a few seconds, something like the following will be displayed on the screen...

Refresh Raids

Scan Log File

Save EP

The data should be checked for accuracy at this point. Make sure the number of rows matches the number of people in the raid at the time attendance was taken. If the numbers do not match, check for anyone who was “anonymous” instead of “roleplay” or if people were outside the raid zone when attendance was taken. These can be added manually.

## EP Entry

Raid Time Stamps ▼

Point Type ▼

	Month	Date	Time	Year	Level	Class	Name	Race	.
1	Jun	13	12:30:20	2024	50	Shadowknight	Toryn	Human	

When the data is confirmed to be accurate and all manual records needed are entered, select the correct “point type” (e.g., Raid – Start, Event Attend, etc.) from the drop down in the upper right corner of the window. Finally, click “Save EP” at the bottom right. The spread sheet will disappear, all drop downs will be cleared, and the EP data will be written to the EPGP Log. The above time stamp, with New Target selected as the point type, will show up in the log like the following picture...

Jun 13 0:10:42 2024	50	Rogue	Kalos	Dwarf		11	6/13/2024	Kalos	Rogue	50	Event Attend	▼

Jun 11 22:56:28 2024	50	Necromancer	Gnomeo	Unknown		11	6/11/2024	Gnomeo	Necromancer	50	Raid - End	▼
Jun 11 22:56:28 2024	50	Bard	Tunezz	Wood	Elf	11	6/11/2024	Tunezz	Bard	50	Raid - End	▼
Jun 11 22:56:28 2024	50	Paladin	Yggdra	High	Elf	11	6/11/2024	Yggdra	Paladin	50	Raid - End	▼
Jun 11 22:56:28 2024	50	Cleric	Steelhammer	Dwarf		11	6/11/2024	Steelhammer	Cleric	50	Raid - End	▼
Jun 11 22:56:28 2024	50	Warrior	Ibite	Ogre		11	6/11/2024	Ibite	Warrior	50	Raid - End	▼

After taking a new attendance in game (e.g., “Raid – Mid” and “Raid – End”), click “Refresh Raids” to update the time stamps available for selection. Then enter EP as before.

## Gear Points

The Gear Points tab has a lot more going on than the Effort Points tab. Here is an overall breakdown of the functionality...

This section is for entering character names and their desired gear levels when a piece of loot is up for grabs. The priority boxes are filled in automatically from the EPGP Log.

The character who has won a piece of loot is entered here. Most of the time, this can be copied from above. The drop-down is a list of names pulled from the EPGP Log, ensuring accuracy.

The current date will be auto-populated here. If desired, the date can be changed by clicking on the box.

The loot item being distributed is entered here. The drop down is a list of every piece of loot ever entered in the EPGP Log. If an item name is misspelled or a new item is entered a confirmation box will appear when "Save GP" is clicked.

These three boxes will display winning bidder information, including the name, priority ratio, and gear level chosen.

This button communicates with the Get Priority tab of the EPGP Log, to determine who has won a piece of loot.

This button copies the winning player and gear level down to the GP Entry section.

These buttons clear the relevant section of the window.

This button appends the date, character, loot, and gear level to the bottom of the GP Log tab of the EPGP Log.

Clear Save GP

## Getting Priority (PR)

To find out who has won a piece of loot, the following process should be followed. Enter the names of each bidder in the Character drop-down boxes in the Get Priority section. These boxes contain a list of every SoS raider, and the boxes feature auto-complete, so getting the names in quickly and easily should be a snap. Then, make sure the gear level each character has bid for is selected. Finally, click the “Find Winner” button. The winning bidder will be pulled from the EPGP Log and displayed in the “Winner” section, as shown below...

	Character	Gear Level	Priority
1	Torny	Major Upgrade	3.1935
2	Luna	Slight Upgrade	9.7325
3	Basko	Major Upgrade	4.4815
4	Kleo	Alt Loot	7.7683
5		Major Upgrade	
6		Major Upgrade	
7		Major Upgrade	

**Winner**  
Basko

**Priority**  
4.4815

**Gear Level**  
Major Upgrade

Clear Find Winner Copy Winner

The information in EPGP-Interface is, as with everything else in the application, pulled directly from the EPGP Log. For example, after clicking the “Find Winner” button as shown above, this is what the Get Priority tab will look like:

Character	Gear Level (GL)	GL PR	Priority
Torny	Major Upgrade	1	3.1935
Luna	Slight Upgrade	2	9.7325
Basko	Major Upgrade	1	4.4815
Kleo	Alt Loot	3	7.7683

Loot Winner		
4.4815	Basko	Major Upgrade

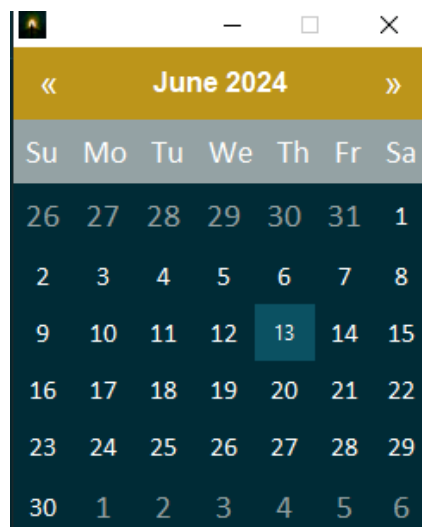

Getting priority can be done multiple times. So, if a last-minute bid comes in and the winner has already been determined, just fill add in the new character’s name and click “Find Winner” again.

## Entering Gear Points (GP)

After determining the winner for a piece of loot, the GP needs to be entered into the Log. That is done as follows. First, click “Copy Winner.” The winner’s name and gear level will be copied down to the GP Entry section. If the date needs to be changed, click the “Date” box, and select a new date in the calendar, as shown...

Then select the loot item from the “Loot” drop-down box. This box is populated with a list of every piece of loot in the EPGP Log, and it also features auto-complete. So, if the item being entered does not come up and it is NOT a new item that has never been won before, then the spelling needs to be checked.

A fully filled out GP Entry form should look like this...

A screenshot of the "GP Entry" form. It has a dark blue background with white text. The title "GP Entry" is centered at the top. Below it are four input fields: "Date" with the value "06/13/24" and a "click to change" link below it; "Character" with a dropdown menu showing "Basko"; "Loot" with a dropdown menu showing "Amulet of Necropotence"; and "Gear Level" with a dropdown menu showing "Major Upgrade". At the bottom right are two buttons: "Clear" and "Save GP".

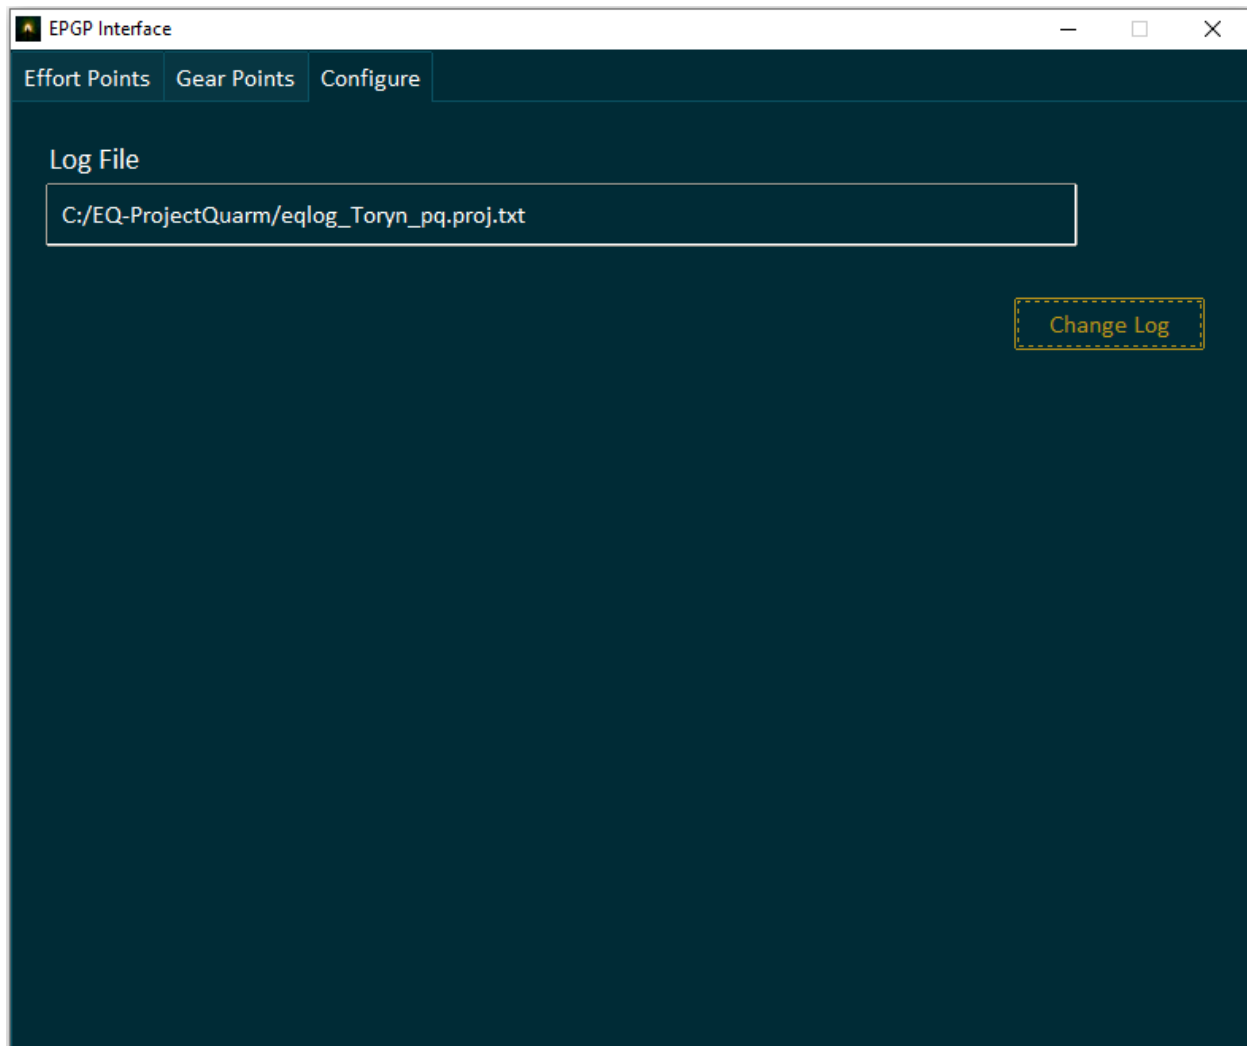

When ready, click the “Save GP” button and the loot will be appended to the bottom of the GP Log tab in the EPGP Log...

06/12/24	Yggdra	Imbued Granite Spaulders	Major Upgrade	100	No
06/12/24	Avenoll	Tome of Miragul	Slight Upgrade	75	No
6/12/24	Steelhammer	Staff of Elemental Mastery: Water	Alt Loot	150	No
06/13/24	Basko	Amulet of Necropotence	Major Upgrade	100	No

After entering GP, all fields in the “Get Priority” and “GP Entry” sections will be cleared to make room for new entries.

## Configuration

The final tab of the EPGP-Interface application is the Configure tab.

The only function currently in this tab is the “Change Log” function. This should rarely be done in practice. One reason would be if an officer changes main characters. Regardless, if the log file does need to be changed, simply click “Change Log”, and select the new EQ log file.

## **Appendix A: Theorcrafting for Nerds**
